### **DETAILED ACTION**

1. With response to letter filed on 1/18/07, applicant has appointed an attorney or agent to conduct all business before the Patent and Trademark Office. Double correspondence with an applicant and applicant's attorney or agent will not be undertaken. Accordingly, applicant is required to conduct all future correspondence with this Office through the attorney or agent of record. See 37 CFR 1.33.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ramzeilles (FR 2,312,373) in view of Collins (US Patent 5,641,573).

Ramzeilles teaches a machine for marking a cork (Page 1, Paragraph 1) with an imprint on its non-calibrated cylindrical surface, characterized by that the imprint is printed with multiple printing plates (30a, 30b) for printing colors. While Ramzeilles does not explicitly disclose a polychromatic image on the cork, it would inherently be a resulting product of the machine. The provision of multiple printing plates for printing colors on a cork would be for the sole purpose of printing different colors on the cork. Applicant should also note that claim 10 is a product by process claim that is defined by

Art Unit: 2854

the claimed structure of the product. However, Ramzeilles does not explicitly disclose a natural cork.

Collins teaches an easy procedure of printing natural corks (Column 1, Lines 11-13). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the invention taught by Ramizeilles to replace the cork thereof with a cork made of natural cork material as taught by Collins since people believe only natural cork allows a wine to age properly.

***Allowable Subject Matter***

3. Claims 2-8 are allowed.

***Response to Arguments***

3. Applicant's arguments with respect to claims 10 and 11 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2854

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
